**Green-Source ProductsSM to Showcase High Performance Green Building SystemTM
at Greenbuild International Conference & Expo**

Cleveland, November 11, 2008 — Green-Source Products, an innovator in green building technology, will showcase its High Performance Green Building SystemTM (HPGBSTM) at the U.S. Green Building Council's Greenbuild International Conference & Expo November 19 – 21, 2008 at the Boston Convention & Exhibition Center.

“Greenbuild is the industry’s largest gathering of representatives from all sectors of the green building movement and will expose the High Performance Green Building SystemTM to over 25,000 green building professionals,” says Joe Westfall, Vice President of Sales & Marketing at Green-Source Products. “Anyone who’s interested in incorporating sustainability into their construction projects will be impressed not only by the green features of our product but by the substantial return on investment it achieves.”

HPGBSTM wall and roof panels have been proven to reduce energy consumption by as much as 50% and are being used in residential and commercial building projects throughout the world.

Green-Source Products will be located in booth 2667.
